Technical Skills

Languages

- JavaScript (ES6+)
- Ruby
- Python
- Dart
- SQL
- HTML5 / CSS3

Frameworks & Libraries

- Vue.js
- Ruby on Rails
- React
- FastAPI
- SQLAlchemy
- Bootstrap/Tailwind CSS

Databases

- Postgres
- MongoDB

Testing & Automation

- Vitest
- Rspec
- Playwright
- Zephyr Scale

Tools

- Git / Github
- Bruno
- Heroku
- CI/CD - Github Actions, Netlify, CircleCI, Codemagic

Career Summary

Software engineer with 5+ years of experience developing production web applications using Ruby on Rails, Vue.js, and PostgreSQL. Delivered scalable APIs, improved test coverage and deployment pipelines, and resolved complex production issues to enhance system reliability. Focused on building maintainable systems and improving team efficiency through better tooling and workflows.

Experience

Software Engineer II - onDiem — September 2020 - Present

- Built and maintained customer-facing features using Vue.js, including application upgrades from Vue 2 to Vue 3.
- Developed API clients and frontend integrations for backend services.
- Wrote unit tests using Vitest to improve frontend test coverage.
- Maintained and enhanced Ruby on Rails backend services, including creating and updating API endpoints.
- Designed and implemented PostgreSQL schema changes using Rails migrations.
- Enhanced internal admin tooling by implementing features and improvements in the Administrate dashboard.
- Built an automated QA testing suite using Playwright and integrated test execution with GitHub Actions and Zephyr Scale.
- Contributed to the Flutter/Dart mobile application by implementing features using Xcode and the iOS simulator and Android Studio.
- Collaborated with engineering, design, and product teams on planning, architecture, and UI/UX decisions.
- Resolved high-priority production issues and implemented ongoing feature improvements across the platform.

Web Developer - WayForth — November 2018 - March 2020

- Led the redesign and deployment of a customer-facing web application interface using Vue.js.
- Maintained and enhanced the front-end codebase using HTML, CSS, and JavaScript to improve user ex
- Designed and implemented responsive web pages following UX/UI best practices and SEO principles.
- Built customer acquisition funnel pages using Vue.js and Bootstrap to support marketing and conversion workflows.
- Developed transactional email templates and user mailers using Ruby.
- Updated marketing website content in WordPress using PHP.
